DRIVER TRAINING

Off Road 4x4 Driving Safety

— DRIVER TRAINING

Introduction

 VENUE RED Training Centre, Donington Park Race Circuit, DE74 2BN	 NO. OF TRAINEES 2 per session, 2 AM & 2 PM	 TRAINING DETAILS 4X4 Off Road Training	 EVENT DURATION 3.5 hours
--	--	--	--

— DRIVER TRAINING

Detail

The course proposed is a half day in duration. It will include a classroom based briefing on off road driving investigating the 4x4 vehicle and safe management of going off road. The driver will then head out to our purpose built off road course to explore safe techniques and vehicle technologies.

On arrival participants will receive tea and coffee and then have the all-important safety & training briefing for the day, this is also an opportunity for the delegates to offer any specific concerns relating to their general driving or any of the course content.

— DRIVER TRAINING

Practical Training

This course has been designed specifically for the 'at work' 4x4 driver.

The course covers the key aspects of driving off road, how to prepare the vehicle before going off road and what to do before returning to the public highway.

It also covers how a 4x4 vehicle can handle so differently from a standard car, particularly when heavily laden. This is explored in the safety of our off road course.

Vehicle mechanics, country side codes, recovery & safety are also covered during this valuable training session.

The off road course at Donington Park has been specifically designed with a wide range of obstacles including ascents, descents, traverses, gravel tracks, grass ruts, mud roads and provides a challenging yet non-damaging test.

— DRIVER TRAINING

Who Is This For?

All drivers who driver a 4x4 vehicle at work, whether on or off road.

— DRIVER TRAINING

Outcome

A full and detailed report will be produced post training / assessment for the driver and manager.
