— DRIVER TRAINING

Detail

The course proposed is a half day or full day in duration and may include any specific areas of training such as speed awareness, post-incident, parking & manoeuvring and Fuel-save. It is aimed specifically at those drivers who are unfamiliar with the dynamic differences of driving a variety of different vehicles (4x4, car-derived vans, commercial vehicles, crew buses etc). The session begins with a briefing and objective setting session; this also provides the opportunity for delegates to offer any specific concerns relating to their general driving or any of the course content.

Setting the scene for any training course is of paramount importance and this particular briefing will cover the reasons for the course which may include the trainee's driving performance or may be as part of a company's H&S policy.

— DRIVER TRAINING

Practical Training

On Road

Following the briefing the course will commence with an eyesight and vehicle check. Our trainer will then take to the wheel to demonstrate many of the aspects covered in the briefing and to further set the scene. Following this the trainee will then drive for the remainder of the session, taking breaks where required, covering the below;

- Practical differences between driving an unfamiliar vehicle to driving a more usual car or van
- Developing the driver's expertise in managing the high-risk environment of urban driving and reducing the likelihood of being involved in a preventable driving incident.
- Other road types will also be covered depending on the geographical location of the training session and the driver's personal needs.
- The coaching session will develop the perceptual skills outlined in the initial presentation and or demo drive and provide ample opportunities to explore the principles of keeping space, identifying risk and keeping visible and communicating with other road users.

— DRIVER TRAINING

Who Is This For?

Any driver who may be changing vehicle type or who has recently changed. This may include car to van, light van to large van and especially those who may be going to drive a 4x4 vehicle, both on and off road.

This course can also be used as an 'assessment course' before selecting drivers to move up to a different class of vehicle.

— DRIVER TRAINING

Outcome

A full and detailed report will be produced post training / assessment for the driver and manager.
